

Teilen system walls

- Office Partitions
- Cubicles & Tabletops
- Free Standing Dividers

- Patented wall system
 - Free 3D Layout
 - 10 Year warranty
- Reusable and Recyclable
- No Maintenance Needed
 - Custom to fit
- Standard 3 week lead time
- We provide installation of all Teilen Product

The **TEILEN** system has been creating functional and elegant environments for more than 40 years. Our system was developed for architecture and interior design spaces which is a conceptually innovative design partitioning system that breaks the rules of the office. Our system walls are a leader's tool to generate a succession of smart work spaces, creating different environments and customized places for each project with the same system.

Our Patented System

Our system offers different proposals that break schemes. We design a system based on a few anodized aluminum bars fixed to the floor and ceiling or half heights with a variety of models and configurations:

- System: 2" Aluminum Bars
- Glass: 1/4" - 3/8" Monolithic or Laminated Temper Glass
- Melamine: 5/8" Practical or MDF Board.

The versatility and flexibility of use, the quick and convenient capacity to organize spaces are some of the most valuable qualities of our system.

- Architectural walls
- Free standing dividers
- Transaction walls

- Frameless glass walls
- Hinged and Sliding doors
- Fixed windows

- Cubicles & Tabletops
- Butt glazed walls
- Office partitions

Demountable Wall

The TEILEN System wall partitions represent the journey of thoughtful research and experimentation in demountable partitioning carried out by engineers. We have gathered all the information that makes it a complete product. Our walls are not only sophisticated but functional and suitable for all markets. They provide versatile configurations and flexibility of use as well as the ability to divide, articulate and organize any space.

An innovative system for attaching the profiles ensures both a fast installation process and a significant reduction in the quantity of materials and components required to create the wall. The result is profoundly innovative and a definitive product which redefines the standards in excellence for interior demountable vertical partition walls. They are a great solution for any Industry.

Frameless Glass Walls

This is a partition without frames. We use 3/8” tempered glass with a joint strip in between (no sticky silicone). This option allows you to have a clearer vision of the space while giving a more modern and innovative touch to create a first-class office.

Hinged, Sliding Doors and fixed window for sheetrock walls.

If you decide to use sheetrock walls, we can provide a solution for your doors and windows creating privacy with visual connections with glass doors and fixed windows or hollow wood doors.

- Hinged Aluminum Frame/Glass
- Hinged Hollow Wood Formica Cover
- Hinged Frameless Glass
- Barn Suspended Frameless Glass
- Barn Suspended Hollow Wood Formica Cover
- Fixed Window 1/4" or 3/8" Tempered or Laminated Glass

Dry erase options

We can design your office to incorporate a dry-erase writing space. Your inspiration can be written everywhere. You can create functional collaborative walls in any space you need.

- Glass Dry Erase Board
- Glass Dry Erase Wall
- Dry Erase Vinyl

Frosted Vinyl

Different options of frosted vinyl that adapt to your ideas, giving elegant privacy without cutting the light.

Electrical Capabilities

We design an electric bar to use where you need switches, receptacles or data. We work with BYRNE products that are pre-manufactured and have an UL certification which does not require permits.

We can also install the bars and have your electrician make the connections using regular electrical products.

Productivity and Semi-Privacy

Our system also allows us to create cubicles or table tops with any height you prefer in order to make it easy on the employees. This will provide semi privacy in an aesthetic way while achieving greater performance in productivity of the company rather than working in open spaces.

Movility and Flexibility

With free-standing dividers, you can always find a solution with TEILEN walls. Our free standing dividers can easily solve any problems of space distribution you may be experiencing while providing durability and flexibility. The system can also be joined with brackets.

We can customize any space since we offer made to order options. We combine melamine with twin wall acrylic polycarbonate panels and we also offer full melamine free standing dividers as an additional option.

Desk Shields.

We have designed a screen to place on any desk. The protective wall is efficient against airborne droplets between colleagues and clients, limiting germs and microbes. We have 3 different materials Glass, Acrylic and Polyester Acoustic Panel.

- Suit to all desk types
- Enables visibility
- Choice of materials
- Various measurements
